DETERMINATION OF FINAL YIELD AND INTEREST RATE OF THE BONDS

The determination of the yield and the interest rate of the Bonds (“Interest Rate”) shall be effected by way of the process of book building (“Book Building”), which shall be kept by the Joint Coordinators and Bookrunners, and will be conducted through the Electronic Book Building process, in which only Qualified Investors may participate.

The interest and the final yield shall be determined by the Joint Coordinators and Bookrunners within the range of yield, by the Electronic Book Building, as further specified in the Prospectus, will be approved by a person authorized by the Board of Directors of the Company and will be announced on the Company's website and on the website of the Athens Stock Exchange no later than the next business day after the expiration of the Public Offering period.

The yield range shall be determined by the Joint Coordinators and Bookrunners and shall be published in the Daily Statistical Bulletin of ATHEX and on the Issuer’s website, at the latest on the previous day of the commencement date of the Public Offering period, for the investors to be notified. It is noted that in order to determine the yield range, a pre-marketing process will be followed, i.e. a joint assessment of the conditions of the Greek and international capital markets, as well as the financial status and prospects of the Issuer’s group of companies. During the period that precedes the Electronic Book Building process (pre-marketing period), the Joint Coordinators and Bookrunners receive indicative offers by Qualified Investors, to determine, pursuant to professional criteria, the yield range that corresponds better to market demand.

The high end of the yield range may be greater than the low end by up to 150 base units.

The final yield and Interest Rate shall be notified to the Hellenic Capital Market Commission and shall be published on the website of the Issuer and ATHEX, at the latest on the next business day following the completion of the Public Offering. The criteria and conditions, on the basis of which the final yield and Interest Rate shall be determined, include the bond market conditions, the volume of demand per yield by Qualified Investors, the volume and type of Qualified Investors, the volume of demand by Retail Investors (to the extent that the final allotment to them will exceed the minimum allotment percentage of 30%), as well as the loan service cost that the Issuer is willing to undertake in connection to the issuance of the bonds.

Indicatively, if the demand by Qualified Investors covers the Bond Loan up to the high end of the yield range but at the same time a material part of the Issue is subscribed at a lower level of yield, the lower level may be selected, even if this would result in a smaller amount of capital raised, and subject to the fulfilment of the condition for the issue of the Bonds.

Concurrently with the determination of the Final Yield, the final allocation of the Bonds will be decided. In any case, the Interest Rate shall be determined within the announced binding yield range. The Interest Rate and Offer Price will be common for all investors, Qualified and Retail, that will participate in the Issue of the Bonds by means of the Public Offering.

Within two (2) business days following the end of the Public Offering, a detailed announcement will be issued by the Joint Coordinators and Bookrunners regarding the outcome of the Public Offering, including the Interest Rate, which will be published in the Daily Statistical Bulletin of ATHEX. Detailed information on the final yield and interest rate is provided in section 4.3.3. "Determination of final yield and Interest Rate of the Bonds by means of a Public Offering by way of the Book Building" of the Prospectus.
